2 Understand age-specific normal and abnormal behavior for dogs and cats to ensure developing or existing behavioral problems are recognized and addressed 3 Promote routine assessment of behavioral development and changes in behavior through the use of standardized assessment tools 4 Provide owners with guidance regarding the most common

Effects of an Invasive Species: Domestic Cats

All cats are carnivorous; and even well-fed domestic cats will continue to hunt if given the opportunity⁵ While feral cats pose the biggest threat to wildlife, all domestic cats, regardless of their habituation to humans, will hunt prey if released outdoors⁶ A study published in 2013 estimates that domestic cats kill

Feral Cats: Impacts of an Invasive Species

Feral Cats: Impacts of an Invasive Species The domestic cat (*Felis catus*) is the most prevalent pet in the US, numbering between 148 and 188 million individuals¹ Originally bred from wild cats (*Felis silvestris*) in the Near East approximately 10,000 years ago,² domestic cats are now con-
