coming Antichrist—but he is only half the story. Many people are amazed to discover in Revelation 17 that there is also another mysterious character at the heart of prophecy—a woman who rides the beast. Who is this woman? Tradition says she is connected with the church of Rome. But isn't such a view outdated? After all, today's Vatican is eager to join hands with Protestants worldwide. "The Catholic church has changed" is what we hear. Or has it? In *A Woman Rides the Beast*, prophecy expert Dave Hunt sifts through biblical truth and global events to present a well-defined portrait of the woman and her powerful place in the Antichrist's future empire. Eight remarkable clues in Revelation 17 and 18 prove the woman's identity beyond any reasonable doubt. A provocative account of what the Bible tells us is to come.

Anunnaki have maintained invisible surveillance over us and how they control our development through religion, secret societies, and catastrophes • Reveals how they feed off our energies and how this ability has allowed them to remain here on Earth as multidimensional entities, enforcing their control invisibly • Explains how they established religion to control us and how Gnostic Christianity--which came from Christ and not the Anunnaki--offers a way out of their matrix of control Cuneiform texts found on clay plates in Mesopotamia tell us about an extraterrestrial race, called the Anunnaki, who came from space to exploit our planet. Through genetic manipulation, they created modern humans from existing earthly life forms to serve them as slaves. They physically left our planet millennia ago, but as Jan Erik Sigdell reveals, their influence and control over humanity is still pervasive and significant. Sigdell explains how the Anunnaki have maintained invisible surveillance over us as well as control over how humanity develops, setting limits on our evolution and holding back our development by means of manipulation and catastrophes, including the deluge immortalized in the Bible and many other ancient myths. He shows how they still manipulate our politics and affairs via secret societies, such as the Illuminati, and the political elite, such as the Bilderberg Group. Examining ancient descriptions of the Anunnaki as entities that resemble winged reptiles or amphibians, the author also explores their diet and how they feed off blood and the energies given off by lower life forms, such as humans, when they are expressing extreme negative emotions, having sex, or dying. This energy-feeding ability has allowed them to remain here on Earth as multidimensional entities, enforcing their control invisibly. He explains how the Anunnaki established religions as tools for control, setting up the major religions with themselves as “gods” and playing them against each other to keep humanity’s attention away from ongoing Anunnaki manipulation. They have also hidden from us the existence of the true highest creator, who created the cosmos as well as the Anunnaki themselves. The author reveals how the highest creator sent a

messenger called Jesus to expose the Anunnaki and show us a way out of their matrix of control through a spirituality based on love, empathy, and sacred sexuality. But the “god” of the Anunnaki defeated this messenger and replaced him with a false Christ. This led to the development of Paulinian Christianity under Anunnaki influence, as well as other parallel religions such as Islam, and the suppression and elimination of the original Christianity, Gnostic Christianity. With the discovery of hidden Gnostic texts and teachings at Nag Hammadi in 1945, the way is now paved for our release from the reign of the Anunnaki.

Yoga and the Body of Christ

This book seeks to prove the Bible through science, studies on Messianic prophecies, and by examining divine patterns in the Word and in nature. It has been newly revised in 2019.

Psychology and the Church

Few of us can venture outside on a clear, dark night and not pause for a silent, reflective look at the stars. For countless centuries people have felt a sense of wonder about the heavens. How did our universe come into being? Has it always been here? Is our existence due to random chance or supernatural design? Is God "out there"? If so, what is He like? Traditionally, the church has answered such questions with Scripture, while science has contributed theories and formulas of its own. Torn between a deep respect for church doctrines and an intellectual need for answers that support what their senses are

telling them, many Christians have avoided such discussions altogether. Actually, the two sides are no longer that far apart. In *The Creator and the Cosmos*, astrophysicist Dr. Hugh Ross explains how recent scientific measurements of the universe have clearly pointed to the existence of God. Whether you're looking for scientific support for your faith or new reasons to believe, *The Creator and the Cosmos* will enable you to see the Creator for yourself.

What do these have to do with the birth of a universe and with your need for meaning? Everything, as you're about to see. How does the cosmos do something it has long been thought only gods could achieve? How does an inanimate universe generate stunning new forms and unbelievable new powers without a creator? How does the cosmos create? That's the central question of this book, which finds clues in strange places. Why A does not equal A. Why one plus one does not equal two. How the Greeks used

kickballs to reinvent the universe. And the reason that Polish-born Benoît Mandelbrot—the father of fractal geometry—rebelled against his uncle. You'll take a scientific expedition into the secret heart of a cosmos you've never seen. Not just any cosmos. An electrifyingly inventive cosmos. An obsessive-compulsive cosmos. A driven, ambitious cosmos. A cosmos of colossal shocks. A cosmos of screaming, stunning surprise. A cosmos that breaks five of science's most sacred laws. Yes, five. And you'll be rewarded with author Howard Bloom's provocative new theory of the beginning, middle, and end of the universe—the Bloom toroidal model, also known as the big bagel theory—which explains two of the biggest mysteries in physics: dark energy and why, if antimatter and matter are created in equal amounts, there is so little antimatter in this universe. Called "truly awesome" by Nobel Prize-winner Dudley Herschbach, *The God Problem* will pull you in with the irresistible attraction of a black hole and spit you out again enlightened with the force of a big bang. These emails, etc. were written to family, friends, and the youth group students I have had the privilege of getting to know and love for the past 25 years. Some of the questions I get are about creation/evolution, the deity of Christ, the end times as well as personal issues such as sexual purity, and how to live a holy life. Part of the book is also about the journey God has brought me through in my personal life. My hope is that however God uses this book, that it pleases and glorifies Him.

Countdown to the Second Coming

Contending with Christianity's Critics is book two in a series on modern Christian apologetics that began with the popular *Passionate Conviction*. This second installment, featuring writings from eighteen respected apologists such as Gary Habermas and Ben Witherington, addresses challenges from noted New Atheists like Richard Dawkins (*The God Delusion*) and other contemporary critics of Christianity concerning belief in God, the historical Jesus, and Christianity's doctrinal coherence. *Contending with Christianity's Critics* and *Passionate Conviction* are the result of national apologetics conferences sponsored by the Evangelical Philosophical Society (www.epsociety.org).

Inside Out

Every religion claims divine authorship for its "holy book." But when one asks whether the claims to divine authorship are supported by history, archeology and sound scholarship, the answer is usually a resounding "no!" But is this the case with the Bible? Is the Bible simply another book mixing history

and historical fiction? Is the Bible mythology or Divine revelation? This small booklet brings together the facts of history, archeology, cosmology and logic with sound biblical scholarship to answer these important questions about the Bible. You owe it to yourself to find the answers to these and other questions about the Bible because the truth of God's message will change your life and your destiny. So I invite you to examine the evidence for yourself and settle the matter in your own mind. You can know the truth and the truth will set you free. - Michael G. Windheuser Ph.d.

The Seduction of Christianity

The treatise De mundo offers a cosmology in the Peripatetic tradition which subordinates what happens in the cosmos to the might of an omnipotent god. promise of his coming? for since the fathers fell asleep, all things continue as they were from the beginning of the creation." --2 Peter 3:3-4 More than two decades after the original printing of this book, Dave Hunt's insights are clearer than ever. During the 1970s when The Late Great Planet Earth was outselling everything, the Rapture was the hot topic. Pastors preached about heaven, and Christians eagerly anticipated being taken up at any moment to meet their Lord in the air. When Christ didn't return, and the 40 years since the establishment of a new Israel in 1948 expired without the fulfillment of prophesied events, disillusionment began to set in. Today, a growing number of Christians are exchanging the hope of the Rapture for a "new" hope--that Christians can clean up society and elect their own candidates to political office to make this world a "heaven on earth." Bestselling author Dave Hunt probes the question "Whatever happened to heaven?" thoroughly and provides an easily understandable explanation of all the many issues and beliefs. Hunt shows us that heaven is really our home and brings fascinating new clarity to why we lost that hope and how it can be regained.

The God Problem

In God and the New Atheism, a world expert on science and theology gives clear, concise, and compelling answers to the charges against religion laid out in recent best-selling books by Richard Dawkins (The God Delusion), Sam Harris (The End of Faith), and Christopher Hitchens (God Is Not Great). For some, these "new atheists" appear to say extremely well what they believe to be wrong with religion. But, as John Haught shows, the treatment of religion in these books is riddled with logical inconsistencies, shallow misconceptions, and crude generalizations. Can God really be dismissed as a mere delusion? Is faith really the enemy of reason? And does religion really poison everything? God and

the New Atheism offers a much-needed antidote to the extremist claims of scientific fundamentalism. This provocative and accessible little book will enable readers to see through the rhetorical fog of this recent phenomenon and come to a clearer understanding of the issues at stake in this crucial debate.

Catechism of the Catholic Church

The Bible clearly states that a great apostasy must occur before Christ's Second Coming. Christians today are being deceived by a worldview that is more subtle and seductive than any before. We will look at some of the dangers in the growing acceptance and practice of: Positive and possibility thinking Healing of memories Self-help philosophies Holistic medicine This seduction of Christianity will not appear as a frontal assault or oppression of our religious beliefs. Instead, it will come as the latest fashionable philosophies that will promise to make us happier, healthier, better educated, and even more spiritual. A compelling look at the times in which we live and a clear call to every believer to choose between the original and the counterfeit. Only then can we hope to escape the seduction of Christianity.

Cosmos

Why are we here? And where are we going? Does science have an answer to these two most fundamental questions of human existence? Can mankind determine and direct the future of life on earth purely by scientific means? Plagued by the failure of modern science to explain the most pressing questions of human existence, many of today's postmoderns are once again boldly going where man has gone before in a desperate final quest for the hidden "holy grail" of cosmology. Erwin Schrödinger, the famed Austrian theoretical physicist who received the Nobel Prize in 1933 for his contributions to quantum mechanics, confided: "[Science] knows nothing of . . . good or bad, God and eternity. . . . Whence came I and whither go I? That is the great unfathomable question. . . . Science has no answer to it." Echoing this dilemma, British astrophysicist Sir Arthur S. Eddington, famous for his work on the theory of relativity in the early 20th century, also reasoned: "Thus, in the physical world, what a body does and what a body ought to do are equivalent; but we are well aware of another domain where they are anything but equivalent. There is a clear distinction between natural law, which must be obeyed, and moral law, which ought to be obeyed. Ought takes us outside of physics and chemistry." Postmodern thinkers take pride in the perpetual pursuit of knowledge--but the questions for readers now holding this book are clear: How will you recognize the seemingly elusive chalice of "ultimate truth" when it actually appears? And finally, what will you do with it when this coveted cup is within your grasp? In a sweeping panorama of inquiry and exploration, the timeless quest within these pages leads grail-seekers and skeptics alike to a destiny-altering consideration of the cosmos--and the question of human existence.

would not, could not, exist. Yet these researchers--along with countless ordinary folks--resist belief in the biblical Creator. Why? They say a loving God would have made a better home for us, one without trouble and tragedy. In *Why the Universe Is the Way It Is*, Hugh Ross draws from his depth of study in both science and Scripture to explain how the universe's design fulfills several distinct purposes. He also reveals God's surpassing love and ultimate purposes for each individual. *Why the Universe Is the Way It Is* will interest anyone who wonders where and how the universe came to be, what or who is responsible for it, why we are here, or how and when the universe ends. Far from leaving the reader at this philosophical jumping-off point, Ross builds toward answering the big question of human destiny and the specific question of each reader's personal destiny.

who set things in motion—or does science offer another explanation? In this startling and lavishly illustrated book, Stephen Hawking and Leonard Mlodinow present the most recent scientific thinking about these and other abiding mysteries of the universe, in nontechnical language marked by brilliance and simplicity. According to quantum theory, the cosmos does not have just a single existence or history. The authors explain that we ourselves are the product of quantum fluctuations in the early universe, and show how quantum theory predicts the “multiverse”—the idea that ours is just one of many universes that appeared spontaneously out of nothing, each with different laws of nature. They conclude with a riveting assessment of M-theory, an explanation of the laws governing our universe that is currently the only viable candidate for a “theory of everything”: the unified theory that Einstein was looking for, which, if confirmed, would represent the ultimate triumph of human reason.

away from religion and a seeking of spiritual truth which has unearthed many questions leaving few with refined answers; who are we? why do we exist on planet earth? what is our purpose? This pivotal time has led to much confusion where literature is of mass yet lost in mystery and intrigue. 'Never Judge a Book by its Cover' delivers a powerful message to the world which identifies the who, why, what, where and when of life and the root cause for the rise in negativity across every landscape of this planet; The deactivation of our DNA many thousands of years ago which altered the mechanics of human form. Poor health, disease, terrorism, poverty, unemployment, religion, homelessness and overcrowding are a direct result of this manipulation which made human beings easy to control through structure, regime and the illusion of separation. You are more powerful than your human brain can comprehend and in sharing my own life experience and the many challenges I have faced including; severe depression, disempowerment, anxiety, abusive relationships, bankruptcy and death I reveal all, making the obvious understood and the not so obvious realised. Life is a game and it is now time to step past your fears, to move beyond the veil of separation and overcome the limitations of your perceived reality. You are a creator god in human form, you are more powerful than any machine in existence and you are here to lead a joyful and fulfilling life, to follow your passions and build your dreams, to love unconditionally and to live without fear. We all hide behind the cover of our own story but once you immerse yourself in the pages of this book you will surely realise your own innate power and rise once more in the knowing of who you are, never again, to judge a book by its cover.

The Latest Scientific Discoveries Point to an Intentional Creator Most of us remember the basics from science classes about how Earth came to be the only known planet that sustains complex life. But what most people don't know is that the more thoroughly researchers investigate the history of our planet, the more astonishing the story of our existence becomes. The number and complexity of the astronomical, geological, chemical, and biological features recognized as essential to human existence have expanded explosively within the past decade. An understanding of what is required to make possible a large human population and advanced civilizations has raised profound questions about life, our purpose, and our destiny. Are we really just the result of innumerable coincidences? Or is there a more reasonable explanation? This fascinating book helps nonscientists understand the countless miracles that undergird the exquisitely fine-tuned planet we call home--as if Someone had us in mind all along.

We stand at the threshold of a revolutionary and empowering new vision of the world. The discoveries of leading-edge science and the insights of spirituality are converging to reveal that the CosMos and all that we term reality is wholly integrated, and that at its most fundamental level, it is a field of information. This is the elemental cosmic mind from which everything emanates, is manifested, and to which all ultimately returns. Research is also demonstrating what the mystics of all traditions have discerned: that we have the innate ability to envision, understand, and experience the CosMos at levels far beyond the limitations of our human persona. Theirs is a perception of a meaningful and co-creative world that is exquisitely tuned to be "as simple as it can be" for consciousness to explore itself. In these momentous times, the vision shared in Cosmos invites us to open our hearts and minds to re-member who we really are and to take our places as conscious co-creators of our realities and of our evolving cosmic destiny.

Star Maker

Thousands of readers have been wonderfully and powerfully influenced by Dave Hunt's authoritative, 590-page hardcover treatise on Calvinism, *What Love Is This?*, but many have asked for a more concise analysis of "reformed" theology. After years of popular demand, The Berean Call is pleased to offer this resource, designed to help believers navigate the confusing and conflicting views surrounding the Five Points of Calvinism, commonly known by the acronym T.U.L.I.P. Presented in an attractive, easy-to-read 5x7 paperback (and "trimmed down" to just 190 pages) are Dave's essential comments on the Five Points--extracted from the pages of *What Love Is This?* and beautifully arranged for greater accessibility. Some readers may never have heard of T.U.L.I.P. Others, though knowing that it has something to do with Calvinism, find it difficult to remember what each letter represents: "T" stands for Total Depravity "U" stands for Unconditional Election "L" stands for Limited Atonement "I" stands for Irresistible Grace "P" stands for Perseverance of the Saints Quoting from the major Calvinistic creeds or confessions (including actual citations and context from the Canons of Dort and the Westminster

Confession of Faith), Dave Hunt proceeds to dissect the "sacred" T.U.L.I.P. one petal at a time--exposing each of Calvin's five points to the light of Scripture as a workman "rightly dividing the word of truth." With reformed theology and reconstructionism enjoying a recent resurgence among young adult ministries and across denominational boundaries, The Berean Call is pleased to offer this long-awaited resource at an attractive price for owning, sharing, and giving.

Science, Religion, and the Search for Extraterrestrial Intelligence

The need to position Christianity in relation to other religions, most notably Judaism and Islam, has brought about a renewed interest in the theme of creation, which has been off the theological agenda for much of the 20th century. Environmentalists, biologists, feminists and process theologians have all registered concerns, from their different perspectives, about the way in which the traditional doctrine of creation characterizes the relationship between the cosmos and its creator. Furthermore, the hoilism of the New Age and its resonance with eastern patterns of thought seems to offer something radically different from the Judaeo-Christian understanding of the creation. It is in the light of these concerns that the author argues for the doctrine of creation as a distictively Christian article of faith. By recognizing at the the same time that criticisms which have been made of its traditional formulations must be properly acknowledged and accommodated, the author is able to use the best insights from secular disciples to construct a theology of creation which is responsible.

Whatever Happened to Heaven?

Most often, the dialogue between religion and science is initiated by the discoveries of modern science—big bang cosmology, evolution, or quantum theory, for example. In this book, scientist-theologian John Polkinghorne changes the discussion. He approaches the dialogue from a little-explored perspective in which theology shapes the argument and sets the agenda of questions to be considered. The author begins with a review of approaches to science and religion in which the classification focuses on theological content rather than on methodological technique. He then proceeds with chapters discussing the role of Scripture, a theology of nature, the doctrine of God, sacramental theology, and eschatology. Throughout, Polkinghorne takes the perspective of Trinitarian thinking while arguing in a style that reflects the influence of his career as a theoretical physicist. In the final chapter, the author defends the appropriateness of addressing issues of science and religion from the specific standpoint of his Christian belief. His book provides an important model for theologians and scientists alike, showing how their two fields can inform one another in significant ways.

Debating Darwin

Set during the height of the Cold War, Dave Hunt's second novel focuses on the secret world of global warfare--not only between East and West but for the ultimate control of planet Earth. Readers will be captivated by this heart-racing, history-based drama that masterfully weaves the perils of international politics with Bible prophecy and spine-chilling manifestations of our spiritual battle. This captivating novel brings the shadowy world of undercover espionage, international intrigue, and demonic deception into razor-sharp focus--in a thrilling plot that could just as easily have been set in the present day: Caught in a conspiracy linking Washington, Moscow, and Rome, Ari Thalberg must make a choice that

could catapult him into leadership in the New World Order or into destruction. Romance, intrigue, and a search for truth collide in a frantic race against death and the forces of evil. As a young boy, Ari Thalberg had been raised as one of the Party's elite--East Germany's hope for dominance in a future world system. But Ari leads a double life: a loyal party member by day, the brilliant organizer of student protests to overthrow communism by night. When the conspiracy is uncovered, Ari is marked for destruction. Now a fugitive without a country, only one nation will take him in. There he must finally face the truth about his despised heritage and the forces that have controlled his destiny. Will Ari's love for Miriam cause him to heed her warnings before it's too late? Or will his fateful obsession to establish world peace drive him into a diabolical chess match with powers beyond his control? Anchored in history, this compelling dramatic thriller takes you behind the scenes of future world events, revealing glimpses of prophesied realities in a sweeping account worthy of the silver screen.

Debating Calvinism

A centuries-old belief system is put to the test as two prominent authors examine and debate the subject of Calvinism from opposing viewpoints. James White, author of *The Potter's Freedom*, takes the Calvinist position. Dave Hunt, author of *What Love Is This*, opposes him. The exchange is lively and at times intense as these two articulate men wrestle over what the Scriptures tell us about God's sovereignty and man's free will. This thought-provoking, challenging book provides potent responses to the most frequently asked questions about Calvinism. Is God free to love anyone He wants? Do you have any choice in your own salvation? It's time to find out. Calvinism has been a topic of intense discussion for centuries. In this lively debate, two passionate thinkers take opposing sides, providing

valuable responses to the most frequently asked questions about Calvinism. Only you can decide where you stand on questions that determine how you think about your salvation. Story Behind the Book The subject of Calvinism has been hotly debated for many years, and now two prominent authors and researchers will debate this controversial topic in a book debate. This project came about when Mr. Hunt wrote What Love is This- Calvinism's Misrepresentation of God. Mr. Hunt was challenged by many on the Calvinist bench and he eventually agreed to do a debate in a book format. The books purpose is to get you to think and come to your own conclusions. Why the Universe Is the Way It Is (Reasons to Believe)

If the discovery of life elsewhere in the universe is just around the corner, what would be the consequences for religion? Would it represent another major conflict between science and religion, even leading to the death of faith? Some would suggest that the discovery of any suggestion of extraterrestrial life would have a greater impact than even the Copernican and Darwinian revolutions. It is now over 50 years since the first modern scientific papers were published on the search for extraterrestrial intelligence (SETI). Yet the religious implications of this search and possible discovery have never been systematically addressed in the scientific or theological arena. SETI is now entering its most important era of scientific development. New observation techniques are leading to the discovery of extra-solar planets daily, and the Kepler mission has already collected over 1000 planetary candidates. This deluge of data is transforming the scientific and popular view of the existence of extraterrestrial intelligence. Earth-like planets outside of our solar system can now be identified and searched for signs of life. Now is a crucial time to assess the scientific and theological questions behind this search. This book sets out

Read Free Cosmos Creator And Human Destiny Answering Darwin Dawkins And The New Atheists

the scientific arguments undergirding SETI, with particular attention to the uncertainties in arguments and the strength of the data already assembled. It assesses not only the discovery of planets but other areas such as the Fermi paradox, the origin and evolution of intelligent life, and current SETI strategies. In all of this it reflects on how these questions are shaped by history and pop culture and their relationship with religion, especially Christian theology. It is argued that theologians need to take seriously SETI and to examine some central doctrines such as creation, incarnation, revelation, and salvation in the light of the possibility of extraterrestrial life.

"Christian Psychology"--an oxymoron? While prominent Christians embrace psychotherapy, acclaimed secular psychologists acknowledge that it is, in fact, a religious practice under the guise of medical science: So common is the use of psychotherapy among Christians today that many pastors themselves are either licensed therapists or are the greatest source of referrals to professional counselors. In addition, the study of psychology has become the number two career choice for all college students; in fact, the popularity of this "science of the soul" is even greater among those enrolled in Christian colleges, universities, and seminaries from coast to coast. Some of the critical questions and crucial answers this book explores include: * From what ancient philosophical roots does psychology originate, and what are its modern fruits? * Is psychology truly a "scientific" means by which the spiritual issues of mankind may be addressed? * What does God's Word prescribe as a remedy for the social ills of our culture, and is that alone sufficient for the Body of Christ? * Can Christians effectively minister using Scripture and prayer by power of the Holy Spirit, or is professional training required? * Is it possible for believers in Christ to "eat the fish and spit out the bones" with regard to psychology's foundation in secular humanism? * Can the mystic and occultic methodologies employed by secular psychotherapists be "sanctified" for practice by Christian counselors? * Does the wisdom of psychology point to the narrow way of biblical Christianity, or toward the broad path that leads to destruction? * What understanding of "Self" can psychology bring to light that Scripture cannot? The purpose of this book is not to attack or condemn evangelicals who are either practicing psychotherapists or those who have been
