In This Garden

Part of a series of exciting and luxurious Flame Tree Notebooks. Combining high-quality production with magnificent fine art, the covers are printed on foil in five colours, embossed then foil stamped. And they're powerfully practical: a pocket at the back for receipts and scraps, two bookmarks and a solid magnetic side flap. These are perfect for personal use and make a dazzling gift. This example features Vincent Van Gogh's dazzling Starry Night over the Rhone painting. In a letter to his sister Wilhemina, Van Gogh wrote: 'Often it seems to me night is even more richly coloured than day.' In this night painting, the sky is Prussian blue, ultramarine and cobalt, with sparkling yellow gaslights and stars. The spot depicted is in Arles, close to the Yellow House he famously rented.

The Algorithmic Beauty of Plants

This book acts as a showcase for a collaborative art project sponsored by artists Angela Cartwright and Sarah Fishburn. The project explores the theme of "gardens" as a metaphor for peace, beauty, tranquility, reflection, and creativity, while at the same offering readers an inspiring collage workbook that explores the techniques, methods, and the insights of the participating artists. The book includes inspiring garden-related quotes that artists can use in their own work, a blank "garden gate" template, and a gallery of garden-themed imagery that readers can alter and use in their own artwork.

Now available in an affordable softcover edition, this classic in Springer's acclaimed Virtual Laboratory series is the first comprehensive account of the computer simulation of plant development. 150

illustrations, one third of them in colour, vividly demonstrate the spectacular results of the algorithms used to model plant shapes and developmental processes. The latest in computer-generated images allow us to look at plants growing, self-replicating, responding to external factors and even mutating, without becoming entangled in the underlying mathematical formulae involved. The authors place particular emphasis on Lindenmayer systems - a notion conceived by one of the authors, Aristid Lindenmayer, and internationally recognised for its exceptional elegance in modelling biological phenomena. Nonetheless, the two authors take great care to present a survey of alternative methods for plant modelling.
