Stables

This book embarks on a lavish tour of horse country across the United States. From private to historic to state-of-the-art, twenty-five striking stables are represented, their origins traced from their vernacular beginnings in the early nineteenth century to the contemporary designs of today.

The Stylish Life

Each of the eighteen masterpiece horse barns featured here is an innovative, beautiful structure that embodies the owners' love and appreciation for horses. Author Randy Leffingwell has selected barns that possess exceptional qualities—a clever response to site challenges; meticulous attention to detail, equine health, and safety; or significant historical context. The purposes of the barns range from havens for private owners to successful breeding and training facilities to historical landmarks. Ultimate Horse Barns captures the architectural beauty of these stunning structures, as well as the love and passion the owners have for their horses.

Horse Crazy

A beautiful style book celebrating the equestrian life and upscale country living in England, Scotland and Ireland that combines high style elegance with all the signature elements of an equestrian-centered life such as tack rooms; trophy and portrait rooms; coach houses, stables, and wood-paneled libraries. A visual study of the equestrian lifestyle, showcasing stables and interiors of country houses and estates of the British Isles and Ireland. Often situated on idyllic grounds these houses boast classical interiors with a traditional décor, which continues to inspire home and lifestyle brands worldwide. Centuries-old

residences belonging to owners of polo ponies; magnificent thoroughbreds; hunt horses; and carriage teams are included in this extensive and lavishly illustrated collection. From Royal Mews and stately homes with stables and barns to polo clubs and stud farms the photography showcases the best of the British Isle's diverse equine homes and is a must-have for any equestrian or traditional interiors enthusiast.

Mystery Horse at Oak Lane Stable

A ridden horse is an athletic horse, and just as a human athlete needs to gauge his diet, condition his cardiovascular and respiratory systems, and take meticulous care of his muscles, bones, and ligaments, so too must the rider maintain these systems in her horse. Now, for the first time in one, full-color comprehensive book, Dr. Nancy S. Loving, noted equine veterinarian and dressage, event, and distance riding competitor, addresses the singularly challenging needs of keeping the working horse in working order. With chapters devoted to cardiovascular, respiratory, neurological, digestive, and reproductive health, as well to the hooves, bones, joints, tendons and ligaments, muscles, and skin, Dr. Loving provides a thorough understanding of the intricacies of the equine body. However, this is not just another veterinary manual. While diseases are indeed clearly explained, and relevant diagnostic tools and methods of prevention and treatment are offered for various ailments, Dr. Loving sets her book apart by diligently applying her scientific knowledge to the practical needs of every pleasure, sport, and performance horse owner—whether you simply hack with friends or compete at the highest level. Over 500 color photographs and 4,000 index entries suitably enrich this consummate text. Whether used as a study guide to better understand your equine athlete or as a quick-find reference when you notice a mysterious new swelling on his near foreleg, *All Horse Systems Go* is the integral ingredient to ensuring your horse can perform to the very best of his ability, whatever his task may be.

Grazing management might seem simple: just put livestock in a pasture and let them eat their fill. However, as Sarah Flack explains in *The Art and Science of Grazing*, the pasture/livestock relationship is incredibly complex. If a farmer doesn't pay close attention to how the animals are grazing, the resulting poorly managed grazing system can be harmful to the health of the livestock, pasture plants, and soils. Well-managed pastures can instead create healthier animals, a diverse and resilient pasture ecosystem, and other benefits. Flack delves deeply below the surface of "let the cows eat grass," demonstrating that grazing management is a sophisticated science that requires mastery of plant and animal physiology, animal behavior, and ecology. She also shows readers that applying grazing management science on a working farm is an art form that calls on grass farmers to be careful observers, excellent planners and record-keepers, skillful interpreters of their observations, and creative troubleshooters. *The Art and Science of Grazing* will allow farmers to gain a solid understanding of the key principles of

grazing management so they can both design and manage successful grazing systems. The book 's unique approach presents information first from the perspective of pasture plants, and then from the livestock perspective—helping farmers understand both plant and animal needs before setting up a grazing system. This book is an essential guide for ruminant farmers who want to be able to create grazing systems that meet the needs of their livestock, pasture plants, soils, and the larger ecosystem. The book discusses all the practical details that are critical for sustained success: how to set up a new system or improve existing systems; acreage calculations; paddock layout; fence and drinking water access; lanes and other grazing infrastructure; managing livestock movement and flow; soil fertility; seeding and reseeding pastures; and more. The author includes descriptions of real grazing systems working well on dairy, beef, goat, and sheep farms in different regions of North America. The book covers pasture requirements specific to organic farming, but will be of use to both organic and non-organic farms.

Feeding horses wasn't supposed to be so complicated. At least that's not what Mother Nature intended. All horses in the wild really needed was a good source of grass and water and a natural salt lick of some kind. But as man began using horses for specific purposes, such as working fields, riding for pleasure or performance, or for breeding, so too did the kinds and amount of feeds owners gave to their animals. In *Understanding Equine Nutrition*, Karen Briggs, a horsewoman and equine nutritionist, sets out to make feeding horses simple again. Whether your horse is a growing yearling, a high-performance athlete, a mom-to-be, or a favorite pasture horse, this important guide will help you make sense of the jargon, sort out the ingredients, and make a feeding plan and menu that is best for your horse.

In Kentucky: Historic Houses and Horse Farms, pre-eminent architectural and interiors photographer Pieter Estersohn guides us through Bluegrass Country, the legendary landscape around Lexington, Kentucky. The wealthiest town west of the Alleghenies prior to the Civil War, Lexington has a rich architectural and cultural history that is manifest in the elegant houses within and around the center. Equally compelling is the equestrian heritage that has made Lexington the "Horse Capital of the World." Among the properties presented are Ashland, an Italian-inspired villa built for distinguished statesman and orator Henry Clay; Pope Villa, one of only two extant residences by Benjamin Latrobe, the architect of the U.S. Capitol; Waveland, a completely intact Greek Revival estate from the 1830s; and Pleasant Hill, the largest restored Shaker community in the country. Dramatic aerial photographs celebrate the rolling landscape and expansive horse farms, including Gainesway Farm, a 1,500 acre site that has produced an impressive roster of legendary Thoroughbreds. Kentucky is a multifaceted and compelling portrait of a unique part of our country that combines a reverence for history and Southern traditions of hospitality and generosity with a vital present.

Golf is a sport with an illustrious pedigree. From the "home of golf," the Royal and Ancient St. Andrews, it has migrated from its Scottish homeland to the globe's most fashionable corners. Defined by a distinctive and quirky dress code, golf is as much about good-natured wagering that accompanies each round. For this very reason, it attracts socialites, captains of industry, and prominent celebrities looking to relax in sylvan surroundings. Access to clubs is highly coveted for the prestige it grants--as well as the sporting pleasures. But readers can bypass the pesky membership committees as they embark on an illustrated tour of the world's finest courses and clubhouses--not to mention glimpses of the stylish players who consider the fairways "a home away from home."

Paddock Paradise (PP) is both a book title and a concept of a more naturalized way of horse keeping based upon the research done on the Great Basin wild horses by natural horse care expert and author, Jaime Jackson. PP is a must-read for any horse-owner or professional who wants to create an environment of more optimal mental and physical health for their horses while drastically reducing the number of hours spent on 'barn' chores. Jackson explains to readers why the concept works and how to create one in a simple and inexpensive manner. Not only do horses exercise more but also eat in the manner that nature intended. Research has shown that free-roaming horses are healthier than stabled ones but many kinds of pasture grasses can cause laminitis. PP is the solution for these issues and others that plague horse owners around the world. "PP is an emerging trend," according to a summer 2011 issue of "The Horse" magazine.

This important reference documents the history of competitive horse-riding from 1912 when the sport first appeared at the modern Olympic Games in Stockholm to the present. It brings together for equestrian enthusiasts a complete document of all the results of competitions to have taken place since 1912, including the Olympics, the European Championships, and the FEI World Equestrian Games. The volume is organized by decade, with both individual and team achievements listed, across the sports three official disciplines: show- jumping, dressage, and eventing. Featuring groundbreaking riders such as Bill Steinkraus, Charlotte Dujardin, and Kevin Staut, and exciting events in the history of the sport, this volume recounts the history of equestrian excellence through fascinating stories and record-breaking events. This entirely original book is the first of its kind, and is replete with previously unpublished information about the sport, riveting stories, archival photographs and text, key facts and figures, and memorable anecdotes. Portraits of riders both male and female and some of the sport's most remarkable horses complete the volume, which acts as a key and original point of reference and an essential addition to the collection of any equestrian lover.

Managing Manure

The aura and romance of Old California lives on in this treasury of inviting homes. The California House presents the magic of the "golden state," that land of infinite promise and dreams, the most tangible expression of which can be found in the homes built by early California dreamers. Here domestic visions of tranquility and repose were inventively realized—in stucco or stone, wood and wrought iron, plaster, and glass and tile. Spanish Colonial Revival – style homes with elaborate wrought-iron window grilles, romantic, shadowy interiors, and lush courtyard gardens stand beside other particularly Californian architectural wonders such as the San Francisco Victorian Painted Lady, the Monterey Colonial, Eureka Queen Anne, and the homey California Arts & Crafts. Including houses designed by luminaries George Washington Smith, Stanford White, Greene & Greene, and Reginald Johnson, this book will fascinate both the architecture aficionado and interior design enthusiasts, as well as the everyday lover of homes. Including, but going beyond, the much-adored Spanish style (in its many manifestations) and Mission Revival, the book features as well the Victorian of San Francisco's Painted Lady and Eureka's Queen Anne, Monterey Colonial, California Arts & Crafts, French Chateau, classic Colonial farm house, and more. All new color photography of 25 houses in California ranging in style from Spanish Colonial Revival, Mission, Victorian, Queen Anne, California Arts & Crafts, Monterey, French Chateau, Colonial Farm House. The book includes little known California work by well known architect Stanford White, known primarily for his East Coast work (designer of the original Penn Station with McKim, Mead & White, and original Madison Square Garden, and many others); as well as the Magdalena Zanone House (Queen Anne late Victorian style home in Eureka, CA); the Murphy House, San Francisco (Classic French Chateau); a Gothic Victorian 1860s home in Sonoma; Casa Amesti (Monterey style home); "El Cerrito" designed by Russel Ray and Winsor Soule and built in 1913 in Santa Barbara (an amalgam of Mission and Spanish Colonial Revival); the Frothingham House designed by George Washington Smith in 1922 (Spanish Colonial Rev.); Cuatro Ventos House by Reginald Johnson, 1929 in Santa Barbara; William Edwards House by Roland E. Coate, Sr. in San Marino, 1926; Robinson House by Greene and Greene in Pasadena, 1905; Sack House in Berkeley (California Arts & Crafts) Brune-Reutlinger House in San Francisco (classic Painted Lady Victorian); a colonial mid-19th cent farm house in Sonoma; "Mariposa," classic Spanish style in Montecito; The Marston House in San Diego (Arts & Crafts/Tudoresque); Rancho Los Alamos De Santa Elena in Los Alamos (Span. Col. Rev.); Pepper Hill Farm in Balard.

In this practical new handbook, architect Keith Warth gives advice on basic stable construction, DIY stables, and the use of old buildings as well as large-scale equestrian establishments. He discusses how the purpose of the stable building is to provide conditions that maintain or improve the physical and mental well-being of the horse. A detailed explanation is given on how to ensure that, through good stable design, fresh air can be available for the animal at all times. There are also examples of how the buildings can affect aspects of hygiene, including alternative solutions for drainage and other services. Essential reading for

professional horsemen, keen amateurs, equine students, or anyone contemplating building, refurbishing, or converting stables.

ONE OF USA TODAY'S " 20 SUMMER BOOKS YOU WON'T WANT TO MISS " In the bestselling tradition of works by such authors as Susan Orlean and Mary Roach, a New York Times reporter and Pulitzer Prize finalist explores why so many people—including herself—are obsessed with horses. It may surprise you to learn that there are over seven million horses in America—even more than when they were the only means of transportation—and nearly two million horse owners. Acclaimed journalist and avid equestrian Sarah Maslin Nir is one of them; she began riding horses when she was just two years old and hasn't stopped since. *Horse Crazy* is a fascinating, funny, and moving love letter to these graceful animals and the people who—like her—are obsessed with them. It is also a coming-of-age story of Nir growing up an outsider within the world's most elite inner circles, and finding her true north in horses. Nir takes readers into the lesser-known corners of the riding world and profiles some of its most captivating figures. We meet Monty Roberts, the California trainer whose prowess earned him the nickname " the man who listens to horses, " and his pet deer; George and Ann Blair, who at their riding academy on a tiny island in Manhattan's Harlem River seek to resurrect the erased legacy of the African American cowboy; and Francesca Kelly, whose love for an Indian nobleman shaped her life's mission: to protect an endangered Indian breed of horse and bring them to America. Woven into these compelling character studies, Nir shares her own moving personal narrative. She details her father's harrowing tale of surviving the Holocaust, and describes an enchanted but deeply lonely upbringing in Manhattan, where horses became her family. She found them even in the middle of the city, in a stable disguised in an old townhouse and in Central Park, when she chased down truants as an auxiliary mounted patrol officer. And she speaks candidly of how horses have helped her overcome heartbreak and loss. Infused with heart and wit, and with each chapter named after a horse Nir has loved, *Horse Crazy* is an unforgettable blend of beautifully written memoir and first-rate reporting.

The Farm Fires

Go behind the scenes and inside the rings at the world's largest and longest competitive equestrian horse show in Wellington, Florida. Spanning twelve weeks during the winter season, this coastal town in Florida plays host to award-winning riders from all fifty states, along with Olympic and national teams from countries near and far, who convene here to chart their horses over jumps, guide them in the distinguished ballet of dressage, or pit them against other champion polo teams. At this competition, known as the Winter Equestrian Festival, no matter where a rider comes from or how they land in the ring, one thing is certain: It takes a steadfast determination to beat the best in the world. All of the author's proceeds from this book will be donated to the Brooke Innovation Fund, which invests in new ideas to improve the welfare of working animals and the lives of those communities that depend on them.
