The Watercolorist's Essential Notebook - Landscapes

An entirely new account of Leonardo the artist and Leonardo the scientist, and why they were one and the same man Leonardo da Vinci has long been celebrated for his consummate genius. He was the painter who gave us the Mona Lisa and The Last Supper, and the inventor who anticipated the advent of airplanes, hot air balloons, and other technological marvels. But what was the connection between Leonardo the painter and Leonardo the scientist? Historians of Renaissance art have long supposed that Leonardo became increasingly interested in science as he grew older and turned his insatiable curiosity in new directions. They have argued that there are, in effect, two Leonardos—an artist and an inventor. In this pathbreaking new interpretation, the art historian Francesca Fiorani offers a different view. Taking a fresh look at Leonardo's celebrated but challenging notebooks, as well as other sources, Fiorani argues that Leonardo became familiar with advanced thinking about human vision when he

was still an apprentice in a Florence studio—and used his understanding of optical science to develop and perfect his painting techniques. For Leonardo, the task of the painter was to capture the interior life of a human subject, to paint the soul. And even at the outset of his career, he believed that mastering the scientific study of light, shadow, and the atmosphere was essential to doing so. Eventually, he set down these ideas in a book—*A Treatise on Painting*—that he considered his greatest achievement, though it would be disfigured, ignored, and lost in subsequent centuries. Ranging from the teeming streets of Florence to the most delicate brushstrokes on the surface of the *Mona Lisa*, *The Shadow Drawing* vividly reconstructs Leonardo's life while teaching us to look anew at his greatest paintings. The result is both stirring biography and a bold reconsideration of how the Renaissance understood science and art—and of what was lost when that understanding was forgotten.

A step by step guide to painting 15 different scenes in watercolor by Canadian artist Peter Humeniuk. From florals to sunsets, barns and lighthouses, this book shows each painting in small increments from beginning to end with descriptions and pictures of each step plus pictures of Peter's palette mixing colors. Beginning to advanced artists can learn how to paint in Peter's loose dramatic style, letting the water be the paint brush. Peter Humeniuk has been making art for over 70 years and his loose renderings of rough water and stormy skies have been inspiring students for many years. His workshops and classes in Canada and the U.S. are well attended and his followers are many. Peter's style does not change for students from beginner to intermediate and advanced, and all benefit from his classes.

Or are you a sketcher looking to infuse for colorful magic in your illustrations? Do you think that the average art instruction book omits too many steps in explaining the illustration techniques? Then this book is for you. Why combine pen, inks and watercolor for illustrations? Pen and ink are the ideal tools to create mind-blowing textures and contrasts in illustrations. In this book, we will learn how to create this magic of texture, contrast and vivid colors. What will you learn in this book? - Pen shading techniques like hatching, cross-hatching, contour shading, stippling, and scribbling. - Acrylic ink shading techniques. - Wet and dry brush techniques for watercolor/ink. - Materials used for pen-ink-watercolor painting. These include the conventional materials as well as some 'exotic' materials (such as table salt and toothbrush!) for creating unique effects. - Creating textures using various shading techniques as well as different materials. Of course, the real learning happens by doing, not just reading. So, we will implement all the shading techniques and the brush techniques into ten step-by-step demonstrations. Each demonstration will teach you how to do the initial rough pencil sketch, line work using pens, and coloring. The ten step-by-step demonstrations will cover the following topics: A House and a Light Pole We will start with this beautiful monochrome illustration using pens and black acrylic ink. Wood and Rusted Metal Texture We will learn to create exquisite textures using pens, ink and watercolor in this exercise. An Old DP (Distribution Point) Box We will learn how a seemingly uninteresting and mundane subject can be used for a beautiful illustration. Also, textures, textures!!
