### The Freethinker

The interplay between science and religion in the seventeenth and early eighteenth centuries is an extremely complex historical topic which has led to an abundant secondary literature, characterized by many debates and interpretations. This reference source is intended to help students at various levels of expertise find their way and make use of this flood of secondary literature. The book, in the annotations, treats the following topics: Historiography; the Magic, Alchemical, and Prisca Traditions; Protestantism and the Rise of Modern Science; Christianity, Social Ideals, Ideology and Science; Social Institutions, Science and Christianity; Religion, Technology, Architecture and the Environment; Theology, Philosophy, and Science; Natural Theology and Natural Philosophy; Heretical Christianity, Deism, and Atheism; Science, the Bible, and Literature; Religion and Medicine; and Newtonian Studies. The major part of this book consists of an annotated bibliography of books and articles arranged alphabetically by author. This is followed by unannotated lists of bibliographies and doctoral dissertations. Three indexes are included: topical, relating each work to one or more broad topical categories; an index of persons who wrote or worked in the period under review; and an index of authors and editors of works cited in the bibliography. Initially designed for students, this guide can be used by non-specialists interested in science and religion.

### Free Inquiry

The library of Jonathan Swift was sold by auction after his death in 1745. Fortunately, there is the auction catalogue, printed in 1746, so we know most of the books Swift owned at the time of his death. The catalogue

lists a total of 657 lots. Earlier in his life, Swift had formed a habit of drawing up lists of the books he had read or owned. The first extant, of his reading, dates from 1697/1698, when he was employed by his mentor Sir William Temple. Another inventory of books he owned, Swift compiled in 1715. Although the sale catalogue was published in facsimile by Harold Williams as *Dean Swift's Library* (Cambridge, 1932), and the 1715 inventory twice (by T.P. LeFanu in 1927 and by William LeFanu in 1988), a thorough and minute description of the volumes in Swift's library has not been undertaken so far. The first part of this handbook, in four volumes, concentrates on the library proper. All individual books are described with a full collational formula, the complete contents, and remarks on the history and transmission of the text, on the life of the author, and on the significance of his writings for a late seventeenth- or early eighteenth-century reader. In order to provide a contemporary assessment of an author's status in Swift's day, the reader always finds a transcription of the relevant entry from the English translation (in two bulky volumes) of Mor é ri's *The Great Historical, Geographical and Poetical Dictionary* (1694), a work also on Swift's shelves. Swift's own copies have been consulted whenever their exact locations are known in European and North American libraries. Moreover, most marginalia and inscriptions have been scrupulously consulted and checked against existing printed versions. They are also fully transcribed. Where Swift is known to have quoted from, referred to or alluded to an author, all identified passages in Swift's writings are presented and discussed. Swift may have consulted many works in the libraries of his friend Thomas Sheridan or of Sir William Temple. Therefore, volume IV contains a transcript of the sale catalogue of Sheridan's library (1739) and a tentative list of Temple's library, reconstructed from references in Temple's works and secondary sources. In volume IV, the reader will find an index of references to Swift's works that enables him to consult this handbook when using the current standard editions of the Dean's poems, prose and correspondence, as well as further indexes of subjects, printers and authors.
