Intriguing stories of how people have died in Yellowstone warn about the many dangers that exist there and in wild areas in general.

### **A Hungry Heart**

His white teacher tells her all-black class, You'll all wind up porters and waiters. What did she know? Gordon Parks is most famous for being the first black director in Hollywood. But before he made movies and wrote books, he was a poor African American looking for work. When he bought a camera, his life changed forever. He taught himself how to take pictures and before long, people noticed. His success as a fashion photographer landed him a job working for the government. In Washington DC, Gordon went looking for a subject, but what he found was segregation. He and others were treated differently because of the color of their skin. Gordon wanted to take a stand against the racism he observed. With his camera in hand, he found a way. Told through lyrical verse and atmospheric art, this is the story of how, with a single photograph, a self-taught artist got America to take notice.

For twelve years, Andrea Lankford lived in the biggest, most impressive national parks in the world, working a job she loved. She chaperoned baby sea turtles on their journey to sea. She pursued bad guys on her galloping patrol horse. She jumped into rescue helicopters bound for the heart of the Grand Canyon. She won arguments with bears. She slept with a few too many rattlesnakes. Hell yeah, it was the best job in the world! Fortunately, Andrea survived it. In this graphic and yet surprisingly funny account of her and others' extraordinary careers, Lankford unveils a world in which park rangers struggle to maintain their idealism in the face of death, disillusionment, and the loss of a comrade killed while holding that thin green line between protecting the park from the people, the people from the park, and the people from each other. Ranger Confidential is the story behind the scenery of the nation's crown jewels—Yosemite, Grand Canyon, Yellowstone, Great Smokies, Denali. In these iconic landscapes, where nature and humanity constantly collide, scenery can be as cruel as it is redemptive.

A never-before-seen collection of United States National Park Service maps This book brings together a collection of over 400 maps produced by the United States National Park Service from 1910 to today. Photographer Brian Kelley has impulsively archived the rarely seen treasures over the past three years, uncovering a design portfolio with little to no credit to their respective designers. The growing collection displays a progressive design approach, from more typographic-driven covers, to the proliferation of duotone print production, culminating in the Unigrad system developed by Italian designer Massimo Vignelli in the 1970s.

Growing up on a Connecticut farm in the 1800s, Frederick Olmsted loved roaming the outdoors. A contest to design the nation's first city park opened new doors for Olmsted when his winning design became New York's Central Park, just one of Olmsted's ideas that changed our nation's cities. Award-winning author Julie Dunlap brings Olmsted to life in this wonderful biography.

Before Rachel Carson, there was George Bird Grinnell—the man whose prophetic vision did nothing less than launch American conservation. George Bird Grinnell, the son of a New York merchant, saw a different future for a nation in the thrall of the Industrial Age. With railroads scarring virgin lands and the formerly vast buffalo herds decimated, the country faced a crossroads: Could it pursue Manifest Destiny without destroying its natural bounty and beauty? The alarm that Grinnell sounded would spark America's conservation movement. Yet today his name has been forgotten—an omission that John Taliaferro's commanding biography now sets right with historical care and narrative flair. Grinnell was born in Brooklyn in 1849 and grew up on the estate of ornithologist John James Audubon. Upon graduation from Yale, he dug for dinosaurs on the Great Plains with eminent paleontologist Othniel C. Marsh—an expedition that fanned his romantic notion of wilderness and

taught him a graphic lesson in evolution and extinction. Soon he joined George A. Custer in the Black Hills, helped to map Yellowstone, and scaled the peaks and glaciers that, through his labors, would become Glacier National Park. Along the way, he became one of America's most respected ethnologists; seasons spent among the Plains Indians produced numerous articles and books, including his tour de force, *The Cheyenne Indians: Their History and Ways of Life*. More than a chronicler of natural history and indigenous culture, Grinnell became their tenacious advocate. He turned the sportsmen's journal *Forest and Stream* into a bully pulpit for wildlife protection, forest reserves, and national parks. In 1886, his distress over the loss of bird species prompted him to found the first Audubon Society. Next, he and Theodore Roosevelt founded the Boone and Crockett Club to promote "fair chase" of big game. His influence among the rich and the patrician provided leverage for the first federal legislation to protect migratory birds—a precedent that ultimately paved the way for the Endangered Species Act. And in an era when too many white Americans regarded Native Americans as backwards, Grinnell's cries for reform carried from the reservation, through the halls of Congress, all the way to the White House. Drawing on forty thousand pages of Grinnell's correspondence and dozens of his diaries, Taliaferro reveals a man whose deeds and high-mindedness earned him a lustrous peerage, from presidents to chiefs, Audubon to Aldo Leopold, John Muir to Gifford Pinchot, Edward S. Curtis to Edward H. Harriman. Throughout his long life, Grinnell was bound by family and sustained by intimate friendships, toggling between the East and the West. As

Taliaferro's enthralling portrait demonstrates, it was this tension that wound Grinnell's nearly inexhaustible spring and honed his vision—a vision that still guides the imperiled future of our national treasures.

### **Invisible Man**

The beginning of a hard sci-fi series, Dream Park is a visionary science fiction classic from Larry Niven and Steven Barnes. A group of pretend adventurers suit up for a campaign called "The South Seas Treasure Game." As in the early Role Playing Games, there are Dungeon Masters, warriors, magicians, and thieves. The difference? At Dream Park, a futuristic fantasy theme park full of holographic attractions and the latest in VR technology, they play in an artificial enclosure that has been enhanced with special effects, holograms, actors, and a clever storyline. The players get as close as possible to truly living their adventure. All's fun and games until a Park security guard is murdered, a valuable research property is stolen, and all evidence points to someone inside the game. The park's head of security, Alex Griffin, joins the game to find the killer, but finds new meaning in the games he helps keep alive. By the mid-1940s. Gordon Parks had cemented his reputation as a successful photojournalist and magazine photographer, and Ralph Ellison was an established author working on his first novel, *Invisible Man* (1952), which would go on to become one of the most acclaimed books of the twentieth century. Less well known, however, is that their vision of racial injustices, coupled with a shared belief in the communicative power of photography, inspired collaboration on two important projects, in 1948 and 1952. Capitalizing on the growing popularity of the

picture press, Parks and Ellison first joined forces on an essay titled "Harlem Is Nowhere" for '48: The Magazine of the Year. Conceived while Ellison was already three years into writing Invisible Man, this illustrated essay was centered on the Lafargue Clinic, the first nonsegregated psychiatric clinic in New York City, as a case study for the social and economic conditions in Harlem. He chose Parks to create the accompanying photographs, and during the winter months of 1948, the two roamed the streets of Harlem together, with Parks photographing under the guidance of Ellison's writing. In 1952 they worked together again, on "A Man Becomes Invisible", for the August 25 issue of Life magazine, which promoted Ellison's newly released novel. Invisible Man: Gordon Parks and Ralph Ellison in Harlem focuses on these two projects, neither of which was published as originally intended, and provides an in-depth look at the authors' shared vision of black life in America, with Harlem as its nerve center.

The outlandish, hilarious, terrifying, and almost impossible-to-believe story of the legendary, dangerous amusement park where millions were entertained and almost as many bruises were sustained, told through the eyes of the founder's son Often called "Accident Park," "Class Action Park," or "Traction Park," Action Park was an American icon. Entertaining more than a million people a year in the 1980s, the New Jersey-based amusement playland placed no limits on danger or fun, a

monument to the anything-goes spirit of the era that left guests in control of their own adventures--sometimes with tragic results. Though it closed its doors in 1996 after nearly twenty years, it has remained a subject of constant fascination ever since, an establishment completely anathema to our modern culture of rules and safety. Action Park is the first-ever unvarnished look at the history of this DIY Disneyland, as seen through the eyes of Andy Mulvihill, the son of the park's idiosyncratic founder, Gene Mulvihill. From his early days testing precarious rides to working his way up to chief lifeguard of the infamous Wave Pool to later helping run the whole park, Andy's story is equal parts hilarious and moving, chronicling the life and death of a uniquely American attraction, a wet and wild 1980s adolescence, and a son's struggle to understand his father's quixotic quest to become the Walt Disney of New Jersey. Packing in all of the excitement of a day at Action Park, this is destined to be one of the most unforgettable memoirs of the year.

fireflies in places like Redwood, Yosemite, and Grand Canyon national parks. On the eve of turning fifty and a little burned-out, Mark decided to reconnect with the great outdoors. He'd spend a year visiting the national parks. He planned to take his mother to a park she'd not yet visited and to re-create his childhood trips with his wife and their iPad-generation daughter. But then the unthinkable happened: his mother was diagnosed with cancer, given just months to live. Mark had initially intended to write a book about the future of the national parks, but *Lassoing the Sun* grew into something more: a book about family, the parks, the legacies we inherit and the ones we leave behind.

The biggest and best single-volume collection ever published of the fascinating and wide-ranging writings of a vitally important nineteenth century cultural figure whose work continues to shape our world today. Seaman, farmer, abolitionist, journalist, administrator, reformer, conservationist, and without question America's foremost landscape architect and urban planner, Frederick Law Olmsted (1822–1903) was a man of unusually diverse talents and interests, and the arc of his life and writings traces the most significant developments of nineteenth century American history. As this volume reveals, the wide-ranging endeavors Olmsted was involved in—cofounding *The Nation* magazine, advocating against slavery, serving as executive secretary to the United States Sanitary Commission

(precursor to the Red Cross) during the Civil War, championing the preservation of America's great wild places at Yosemite and Yellowstone—emerged from his steadfast commitment to what he called “communitiveness,” the impulse to serve the needs of one's fellow citizens. This philosophy had its ultimate expression in his brilliant designs for some of the country's most beloved public spaces: New York's Central Park, Prospect Park in Brooklyn, Boston's “Emerald Necklace,” the Biltmore Estate in North Carolina, the grounds of the U.S. Capitol, garden suburbs like Chicago's Riverside, parkways (a term he invented) and college campuses, the “White City” of the 1893 World's Columbian Exposition, and many others. Gathering almost 100 original letters, newspaper dispatches, travel sketches, essays, editorials, design proposals, official reports, reflections on aesthetics, and autobiographical reminiscences, this deluxe Library of America volume is profusely illustrated with a 32-page color portfolio of Olmsted's design sketches, architectural plans, and contemporary photographs. It also includes detailed explanatory notes and a chronology of Olmsted's life and design projects. From the Hardcover edition.

Now adapted for readers ages 12 and up, the award-winning biography that examines Parks's life and 60 years of radical activism and brings the civil rights movement in the North and South to life Rosa Parks is one of the most well-known Americans today, but much of what is known and taught about her is incomplete, distorted, and just plain wrong. Adapted for young people from the NAACP Image Award—winning *The Rebellious Life of Mrs. Rosa Parks*, Jeanne Theoharis and Brandy Colbert shatter the myths that Parks was meek, accidental, tired, or middle class. They reveal a lifelong freedom fighter whose activism began two decades before her historic stand that sparked the Montgomery bus boycott and continued for 40 years after. Readers will understand what it was like to be Parks, from standing up to white supremacist bullies as a young person to meeting her husband, Raymond, who showed her the possibility of collective activism, to her years of frustrated struggle before the boycott, to the decade of suffering that followed for her family after her bus arrest. The book follows Parks to Detroit, after her family was forced to leave Montgomery, Alabama, where she spent the second half of her life and reveals her activism alongside a growing Black Power movement and beyond. Because Rosa Parks was active for 60 years, in the North as well as the South, her story provides a broader and more accurate view of the Black freedom struggle across the twentieth century. Theoharis and Colbert show young people how the national fable of Parks and the civil rights movement—celebrated in schools during Black History Month—has warped what we know about Parks and stripped away the power and substance of the

movement. The Rebellious Life of Mrs. Rosa Parks illustrates how the movement radically sought to expose and eradicate racism in jobs, housing, schools, and public services, as well as police brutality and the over-incarceration of Black people—and how Rosa Parks was a key player throughout. Rosa Parks placed her greatest hope in young people—in their vision, resolve, and boldness to take the struggle forward. As a young adult, she discovered Black history, and it sustained her across her life. The Rebellious Life of Mrs. Rosa Parks will help do that for a new generation.

Fulton Parks, IV has grown up in privilege, but feels imprisoned in what he calls "The Big House." His dreams of escape are dashed when he is "sentenced" to a prestigious university by his domineering father. Reluctantly, he leaves his beloved, but eccentric aunt and his wayward girlfriend. Even as his own world spins out of control Fulton tries to save the women in his life and ultimately is brought to a reckoning. Set in the urban sprawl of Houston in the late 1970's, Fulton's story is an irreverent and suspenseful journey filled with an odd group of misfits who help him overcome his personal demons. Funny and sad, The Fulton Parks Scholarship Fund unravels the lies of the Parks family and shows us how letting go of our own family myths can set us free.

Award-winning author Brad Parks delivers a tense novel of thrills, twists, and deceit that grabs you and won't let go until the final, satisfying page. Tommy Jump is an out-of-work stage actor approached by the FBI with the role of a lifetime: Go undercover at a federal prison, impersonate a convicted felon, and befriend a fellow inmate, a disgraced banker named Mitchell Dupree who knows the location of documents that can be used to bring down a ruthless drug cartel. . . if only he'd tell the FBI where they are. The women in Tommy's life, his fiancée and mother, tell him he's crazy to even consider taking the part. The cartel has quickly risen to become the largest supplier of crystal meth in America. And it hasn't done it by playing nice. Still, Tommy's acting career has stalled, and the FBI is offering a minimum of \$150,000 for a six-month gig—whether he gets the documents or not. Using a false name and backstory, Tommy enters the low-security prison and begins the process of befriending Dupree. But Tommy soon realizes he's underestimated the enormity of his task and the terrifying reach of the cartel. The FBI isn't the only one looking for the documents, and if Tommy doesn't play his role to perfection, it just may be his last act.

Human rights activist Park, who fled North Korea with her mother in 2007 at age 13 and eventually made it to South Korea two years later after a harrowing ordeal, recognized that in order to be "completely free," she had to confront the truth of her past. It is an ugly, shameful story of being sold with her mother into slave marriages by Chinese brokers, and although she at first tried to hide the painful details when blending into South Korean society, she realized how her survival story could inspire others. Moreover, her sister had also escaped earlier and had vanished into China for years, prompting the author to go public with her story in the hope of finding her sister.
